WHY DIVE THE KOHALA COAST?

When people dive the Kohala coast for their first reaction is amazement. Our reefs are pristine, untouched, and virtually undiscovered. This is indeed the prime diving destination on the Big Island of Hawaii. The terrain is varied offering canyons, arches, swim through lava tubes, and plenty of caverns to explore. The Puako reef has a vast display of green sea turtles, a manta ray cleaning station, and an abundant display of garden eels. North of Kawahai we find large schools of fish and beautiful fields of coral. This is where the wildlife come to escape the hustle and bustle!

Besides, this is where you want to stay when you visit the Big Island of Hawaii. All the best of Big Island accommodations are within minutes of our retail store & dive sites.

In fact, there are many snorkel and shore diving options in the backyard of your hotels or vacation rentals. We can tell you the best spots for whatever activities you have planned.
